Mr. Shawn Ghose, EPA Project Coordinator  
Superfund AR/LA Enforcement Section (6SF-AP)  
U.S. Environmental Protection Agency  
1445 Ross Avenue  
Dallas, Texas 75202

**Subject: Resubmittal of: Amended Petition to Eliminate Certain Spring Monitoring  
Arkwood, Inc. Site, Omaha, Arkansas**

Dear Mr. Ghose:

Per your request, I am resubmitting our Amended Petition to Eliminate Certain Spring Monitoring at the Arkwood, Inc. Site. The subject springs were monitored from 1996 to 2001 with no contaminants detected after January 1997. We continue to conduct springhead treatment at New Cricket Spring. Samples are collected at New Cricket Spring on a monthly basis for operational and monitoring purposes. The concentration of PCP in New Cricket Spring has decreased from approximately 1,700 ppb in the 1989 to an average of about 132 ppb in 2004. The springhead treatment system continues to operate efficiently and effectively.

I certify that the information contained in or accompanying this submission is true, accurate, and complete to the best of my knowledge, information and belief, and that I, as project coordinator, have made reasonable inquiry into its veracity.

If you have any questions regarding this resubmittal, please do not hesitate to contact me at (608) 848-4134.

Sincerely,

Jean A. Mescher, Project Coordinator  
Director, Environmental Services
